Morphix Technologies® TraceX® Explosives Detection Kit Is Ideal for Detecting Explosives in Military Scrap Metal

Virginia Beach, Va. (January 2017) – [Morphix Technologies®](http://www.morphtec.com), an innovator in the science of detection devices for dangerous chemicals, announces its [TraceX® Explosives Detection Kit](#) is ideal for detecting explosives in military scrap metal and keeping inspection agencies and scrap metal workers safe and out of harm’s way.

Military scrap metal is valuable because it often contains copper and other premium metals that are used in armored vehicles and tanks. However, military scrap metal can be dangerous and could possibly contain explosive material like mortars, ammunition or mines. Explosive scrap metal has caused injuries and death to workers at scrap metal yards in many countries.

Explosive detectors are used to ensure the scrap metal is safe. The detector needs to be reliable, easy-to-use and cost-effective. Many detectors are fragile and their use requires specialized training, a large budget and they are often difficult-to-use and require regular maintenance.

The TraceX Explosives Detection Kit is the perfect solution as it is simple-to-use, convenient, low cost, accurate and reliable. The user can be trained to use the kit by viewing a [twelve-minute-training-video](#). With a single swab, the [TraceX Explosives Detection Kit](#) detects all the major families of explosive materials and their precursors. With the simple color-change alert system, a single color indicates the presence of a particular family of explosive material in a single test.

-more-

“We’re glad that we can do our part in keeping others safe from unexploded ordinance that can sometimes be found in military scrap metal. We just hope that we can get the word out there so that more people will use the TraceX kit and lives will be saved,” said Kimberly Pricenski VP of sales and marketing for Morphix Technologies.

If you’d like to receive more information regarding the TraceX, please contact Morphix Technologies toll free at 800-808-2234 or locally at 757-431-2260. You can also email sales@morphtec.com.
