FOR IMMEDIATE RELEASE

U.S. Coast Guard Awards Morphix Technologies® as the Sole Supplier of Chameleon Chemical Detection Cassettes

The U.S. Coast Guard now has improved capability with the addition of two Chameleon cassettes to its previous custom HazMat kit of eight Chameleon cassettes.

Virginia Beach, Va. (August 2017) – [Morphix Technologies®](http://www.morphtec.com), an innovator in the science of detection devices for dangerous chemicals, announces its most recent contract award: to be the sole supplier for the U.S. Coast Guard’s custom Chameleon® HAZMAT Refill Cassette Kits. Morphix is the current supplier of the U.S. Coast Guard’s inventory of over 6,000 [Chameleon® Chemical Detection Armbands](#). This new contract

will allow Morphix Technologies’ to provide increased capability with the Chameleon HazMat Refill Kit containing Chameleon cassettes for 10 hazardous chemicals rather than eight. The CBRNe branch has articulated that with each mission, USCG personnel enter unknown areas with absolutely no idea what type of dangers they may encounter. This additional detection capability will help keep themselves and those they serve safer.

The Chameleon Chemical Detection Armband is an easy-to-use, inexpensive, wearable, reusable armband that can hold up to 10 one-time-use, disposable cassettes. Each cassette detects a particular toxic chemical or class of chemicals and changes colors upon detection of the chemical agent. The Chameleon Chemical Detection Armband has been

approved by the U.S. SAFETY Act of the Department of Homeland Security as an anti-terrorist technology.

“We are so very grateful for the opportunity to continue to provide the Chameleon to the United States Coast Guard. The increased capability with the additional cassettes provides even greater safety to those that serve and protect us,” said Kimberly Pricenski, VP of sales and marketing for Morphix Technologies.
