FOR IMMEDIATE RELEASE

**MORPHIX TECHNOLOGIES® WINS DEPARTMENT OF HOMELAND SECURITY  
IDIQ CONTRACT FOR THE CHAMELEON® CHEMICAL DETECTOR CASSETTES**  
*Chameleon Chemical Detectors Approved for use by the U.S. Coast Guard in a Maritime  
Environment*

**VIRGINIA BEACH, VA (July 2012)** – [Morphix Technologies®](http://www.morphixtech.com), an innovator in the science of colorimetric detection devices for toxic gases, has been awarded an Indefinite Delivery/Indefinite Quantity (IDIQ) contract by the Department of Homeland Security. The contract stipulates that Morphix Technologies is the sole source to supply the [Chameleon®](http://www.morphixtech.com) customized chemical detection unit with eight (8) chemical detector cassettes.

The award states that, “Morphix Technologies is the only manufacturer that is capable of producing an acceptable maritime chemical detection system for the U.S. Coast Guard that has been tested and verified by an independent U.S. Government laboratory. Testing and verification requires the detection cassettes to be fully capable to be worn for an extended period of time in an operational environment (land and maritime), diverse weather climates/environments and be submerged in salt/fresh water for extended periods. The Department of Defense has completed its verification of the Morphix Technologies detection cassettes for the intended operational environment. Additionally, the USCG has completed extended operational evaluations during its 13-month WMD response test and evaluation program. As a result of this verification process, the lightweight chemical detectors have been approved for use by the USCG in a maritime environment that contains chemical agents.”

Unlike current colorimetric detection systems, the [Chameleon®](http://www.morphixtech.com) is designed to military standards for use in a wide variety of operating environments. It can be used in desert heat, arctic cold or tropical conditions and can even be immersed in water.

For more information on any of the [Chameleon®](http://www.morphixtech.com) Detection Kits visit [www.morphixtech.com](http://www.morphixtech.com).

**About Morphix Technologies®:**

Morphix Technologies®, located in Virginia Beach, Virginia, is an ISO 9001:2008 certified company developing and manufacturing products that detect invisible dangers in order to save lives. Morphix Technologies has taken innovation to the next level with high-quality, easy-to-use, cost effective simple colorimetric sensor technology for military, first responders, emergency, homeland security and industrial personnel. The latest product, the [Chameleon®](http://www.morphixtech.com), a wearable device that allows hands-free detection of up to ten different hazards at one time in a variety of operating environments, has provided their customers whose job is often in Harm’s Way, a lifesaving, early response system like no other on the market today.
