The TraceX® Explosives Detection Kit is an affordable and easy-to-use product that aids in the detection of major explosive material threats and their precursors in a single test without exposing the user or kit to contamination or dangerous chemicals. The TraceX® Explosives Detection Kit was developed by Morphix Technologies® under contract from the U.S. Department of Defense and meets their demanding requirements. It is small enough to fit in a cargo pocket, lightweight and rugged. Each kit comes in its own disposable protective plastic case, so the handler will be ready to use it when needed. With a single swab, the TraceX® Explosives Detection Kit detects all the major families of explosive materials and their precursors.
