FOR IMMEDIATE RELEASE

## Morphix Technologies® Releases Instructional Video on How-to-Use the TraceX® Explosives Detection Training Kit

*The training kit is designed to teach law enforcement, military and intelligence personnel how to properly operate the TraceX® Explosives Detection Kit when in the field.*

Virginia Beach, Va. (June 2015) – [Morphix Technologies®](http://MorphixTechnologies.com), an innovator in the science of detection devices for dangerous chemicals, has created an instructional video with step-by-step instructions on how-to-use the [TraceX® Explosives Detection](http://TraceX.com) Training Kit. The kit has been newly designed for military, law enforcement and intelligence personnel training facilities and schools in response to the increasing need for homemade explosive detection training. The video instructs these individuals how to use the Training Kit and the importance of the product; it can be viewed on YouTube [here](#).

*Click on the image above to watch the video.*

Once trained, military, law enforcement and intelligence personnel will be able to quickly and easily identify bombers, bomb-makers and their bomb-making facilities in a single test using the TraceX® Explosives Detection Kit.

*The TraceX® Explosives Detection Training Kit*

“We created this instructional video as part of our commitment to ensure users have the training tools to confidently use the TraceX® Explosives Detection Kit. We hope that this training will help you identify bomb-makers who use explosive devices to cause destruction and fear,” said Kimberly Pricenski, Morphix Technologies® VP of sales and marketing.

The TraceX® Explosives Detection Training Kit makes training simple. Each Training Kit comes with a set of pictorial operating instructions and is provided in a sealed pack containing one TraceX® Explosives Detection Kit, a blue plastic film and a foil bag labeled “citric acid powder.”
